

# TRACKSTAR RACING

## Siamese Bangers

TOP CAR.....Any car that's eligible for MICRO Bangers, NO Engine, Gearbox, Fuel Tank, Battery. Built to normal ORCi safety spec, I.e. Frame, Roof plate, Doorplate etc. Complete shell, less wheels

BOTTOM CAR.....built to normal 2litre Banger spec as per ORCi Rules, including from 2022 a Roof plate

The top car does the steering, a bar to be WELDED from the top car steering column to the bottom car steering rack.

The bottom car supplies the power and brakes, steering must be disconnected.....steering wheel to remain fitted.

The Two cars are to be connected by bolting or welding (not ratchet strapping) a minimum of 6 large bolts and large plates or 2x2 box section to connect the cars through the roof of lower car, and floor of upper car. Its advised to weld the plates/box section to the relevant floor/roof.
